

A large, curved wall in a dark room is covered in a vibrant, blue-toned digital projection. The projection depicts a fantastical, underwater-like environment with glowing green and blue elements, possibly representing a digital landscape or a complex data visualization. The ceiling is dark with some recessed lighting fixtures.

## Integration and audiovisual engineering

---

Specialists in projects and engineering,  
we integrate the latest technologies  
in audiovisual equipment.

We want to be your trusted technology partner. We carry out cutting-edge audiovisual projects, with customized solutions that meet your needs and improve productivity, collaboration and the daily life of our customers

With our own team of engineers and specialized technicians, we carry out the design, installation and maintenance of the implemented projects

Project consulting  
and engineering

Management, installation  
and startup

Remote support and  
maintenance

Technical support for  
events and functions

# Technologies

Modular LED screens
